Pad Description

PAD	Function	Description
1	RF	RF signal terminal, blocking capacitor required.
2	LO	LO signal terminal, blocking capacitor required.
3	IF	IF signal terminal, blocking capacitor required.
Die Bottom	GND	Die bottom must be connected to RF/DC ground.

1. The LO and RF ports are used interchangeably, and the electrical performance specifications vary partially.
2. It is recommended that the pads be welded with three bonded alloy wires.
